About Me

I am an expert in Python-based Web Automation, Scraping and Web App, with extensive experience in developing scalable, reliable, and secure data extraction systems. My specialization includes Django backend development, automation pipelines, and solutions for bot-resistant scraping.

I have successfully delivered automation tools, scraping systems, and SaaS backends for clients globally, with a strong emphasis on performance, accuracy, and long-term maintainability.

Skills

- Python (Automation & Scripting)
- Web Scraping (BeautifulSoup, Scrapy, Selenium, Playwright)
- Django & Django REST Framework
- Desktop App Development (Windows & Mac)
- Anti-Bot & CAPTCHA Handling
- Proxy Rotation & Rate Limiting
- API Development & Integration
- Tkinter / PyQt / Kivy
- PostgreSQL / MySQL / MongoDB
- Linux & VPS Deployment

Certification

- Python Programming**
Udemy 2019
Completed an in-depth Python Programming certification covering core Python concepts, scripting, automation, and real-world problem solving. Gained hands-on experience building efficient, reusable, and production-ready Python solutions. Built some Desktop Applications.
- The Complete Web Development Bootcamp**
Udemy 2019
Completed a comprehensive web development bootcamp covering HTML, CSS, JavaScript, backend fundamentals, and practical project-based learning. Built strong foundations in full-stack development and modern web technologies. Built web apps using Django and React.

Experience

- Software Developer**
Interco 2020-2025
Software Developer at Interco (2020–2025). During my time at Interco, I contributed to various web and desktop projects. My responsibilities included creating scalable backends, APIs, and automation tools, as well as developing cross-platform applications. I focused on streamlining workflows and delivering efficient, high-quality solutions.
- Junior Software Developer**
Id Nube 2021-2021
Full-Stack Developer at Id Nube (2021) – Built scalable web and desktop applications using Python and Django. Collaborated with cross-functional teams to deliver reliable, high-quality solutions and successfully managed 3 client web projects end-to-end.
- Full stack Developer**
Upwork 2024-Present
Working at Upwork(as Freelancer) been 6+ years and contributing to web, mobile, and desktop projects. Built Django backends, React/Next.js frontends, React Native apps, and desktop tools using Tkinter and PyQt5, ensuring scalable and reliable solutions.
- Full stack Developer**
Fiverr 2020-Present
Full-Stack Developer at Fiverr(as Freelancer) with hands-on experience in Python, Django, React, React Native, and Desktop Apps using Tkinter and PyQt5, delivering scalable and production-ready solutions.

Core Services

- Web Automation & Bot Development
- Web Scraping (Anti-bot, Captcha-safe)
- Django Web Applications & APIs
- Django Backend & REST APIs
- SaaS Backend Development
- Desktop Apps (Tkinter, PyQt, Kivy)
- Data Extraction & Processing
